Why Petra Medical College?

In the last 30 years, we've trained over
50,000 students.
Petra knows health science.

Petra Medical College is an online vocational school specializing in allied health sciences. We offer a wide range of flexible online courses and certificate programs that prepare students for national certification—and for rewarding careers in healthcare.

Whether you're an individual student looking to advance your education, or a school administrator seeking to bring career-focused healthcare programs to your campus, PMC provides the tools, training, and support to help future medical professionals succeed.

Affordable

We help fit training into your budget with our courses' low costs. For our programs, we allow students to pay tuition payments as you go – course by course. So students only have to pay for each program course one at time.

Online Learning

Future-forward, flexible, and convenient, you can join the medical profession now – on your timing – and skip the commute.

On-Demand Education

With no set class times or enrollment periods, you can begin at anytime and finish at your own pace. 24/7 learning that fits your schedule.

Mobile & Tablet Friendly

All our classes are multi-platform responsive, so you can learn the way you like on mobile, tablet, or desktop – at home or on the go.

Join In-Demand Careers

Gain the knowledge, skills, and credentials you need to join the healthcare industry, which is the fastest growing career field in the U.S.

Learn from the Best

Petra has trained over 50,000 students in its 30 plus years experience; all our instructors are industry professionals.

What to Expect when Partnering with PMC

How it works

Step 1

Create your free partner account.

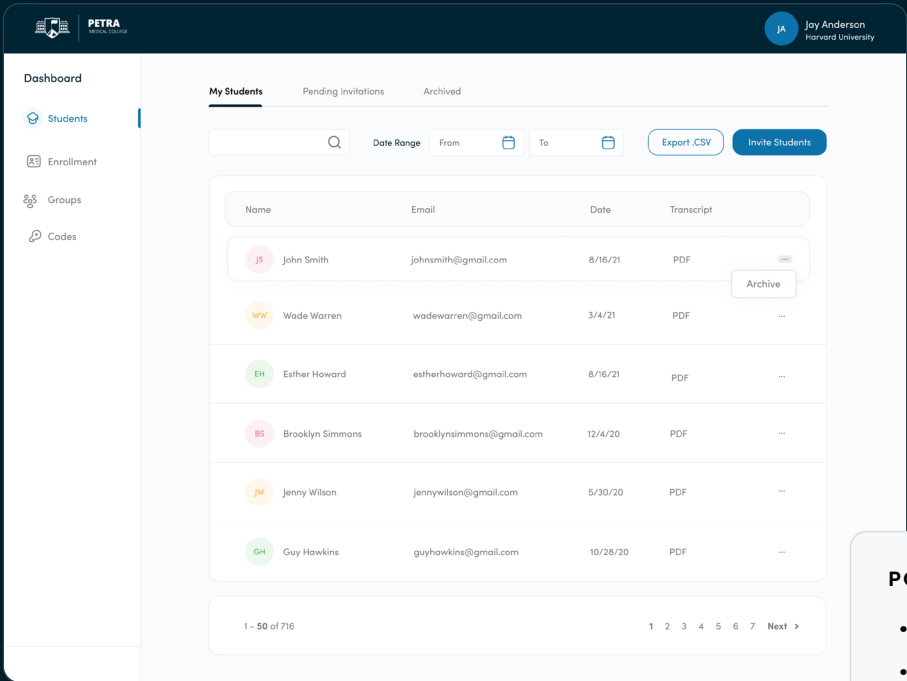

Optional: Appoint one teacher to use the portal to oversee student enrollment, progress, and even practice skills.

Step 2

Provide your students with a simple course registration code, they get immediate access to all course content.

Step 3

Let your students take courses on either personal or school devices, at the computer lab, or at home as a virtual, offsite campus.

We built you a Partner Portal!

- Student records
- Detailed reporting with the ability to export all your data
- Easily view and track student progress

Optional:

- Organize students into groups
- Archive students or groups

PORTAL FEATURES

- Register students
- Track student progress
- Detailed reporting

Partnership Benefits

Offer an entire suite of allied health courses and programs for your students, all online.

Students can learn at their own pace and advance as they master each skill, so motivated students can finish faster.

Graduation with specialization Focus Courses helps students get jobs.

Students earn National CTE certifications.

Offer students multiple CTE certifications

Our graduates are prepared for online medical industry certifications

Medical Assistant National Certification Exams
RMA, CMA, CCMA, NCMA

Veterinarian Assistant National Certification Exam
CVA

Phlebotomy Technician National Certification Exam
CPT

Limited License Radiology Technologist Exam
CLLRT

Electrocardiogram Technician (EKG Tech) National Certification Exam
CET

CTE Certifications

Many of Petra Medical College's courses and programs lead to earning certification credentials. We recommend the fully online testing offered by [American Allied Health](#): PMC graduates are granted eligibility codes and the test may be taken online, from your own device directly upon finishing the course. The exam registration fee is not included in course tuition.

PMC COURSE / PROGRAM	CERTIFICATION EXAM	EXAM COST
 Medical Assistant Certificate Program	Registered Medical Assistant, RMA	\$110.00
 Phlebotomy Technician	Certified Phlebotomy Technician, CPT	\$105.00
 EKG Technician	Certified EKG Technician, CET	\$105.00
 Veterinarian Assistant	Certified Veterinarian Assistant, CVA	\$100.00
 Limited License Radiology Technologist	Limited License Radiology Technologist, CLLRT	\$125.00

Programs Verses Courses

Programs consist of multiple courses that build toward a certificate of completion. Students may take them one course at a time, but all courses in the program must be completed to earn the certificate. **Courses**, on the other hand, are stand-alone classes that can be taken individually and lead to a course certificate. Both Programs and Courses are graded on a Pass/Fail basis, determined by the successful completion of the required coursework.

Programs

Medical Assistant Certificate Program

Nursing Assistant Certificate Program

Courses

PMC’s courses deliver state-of-the-art online instruction, while hands-on skills are developed through in-house labs or on-the-job training.

Medical Assistant Foundations

Mental Health
SPECIALIZATION ELECTIVE COURSE

Anatomy & Physiology

Pediatric Care
SPECIALIZATION ELECTIVE COURSE

Medical Terminology

OBGYN
SPECIALIZATION ELECTIVE COURSE

Phlebotomy Technician

Limited Licensed Radiologic Technologist

EKG Technician

LLRT Certification and State Licensure Exams Prep Course

Veterinarian Assistant

Nursing Assistant Unit I

Labor & Delivery
SPECIALIZATION ELECTIVE COURSE

Nursing Assistant Unit II

More Information (FAQs)

Are there any partnership fees?

No. Your partner portal is a free student management system. It's like having a virtual extension campus for allied health classes – but with zero start up costs. To get started, create your free partner account and we'll ask for basic contact information including the name of your organization and your email address.

How Does Billing Work?

Students may self-pay for any course. But if your organization plans to pay on their behalf, students use a course Registration Code to freely access the course materials. Then PMC will send a detailed invoice.

What are the System Requirements?

PMC's platform is compatible with all modern web browsers and either Apple or PC/Android systems. The learning portal may be accessed via internet connection on a desktop computer, laptop, Chromebook, tablet, or mobile device.

What's the Difference Between Programs and Courses?

Courses vary from 9 weeks to a single semester and are stand-alone classes that lead to a single career track (e.g. EKG Technician). Certificate programs, however, take 4–6 months and lead to multiple career tracks. The medical assistant program, for instance, consists of five separate courses and equips students for multiple career paths – medical assistant, EKG technician, or phlebotomist.

How Does PMC Handle Skills Training?

PMC provides the didactic (online classroom) training, while partner schools deliver the hands-on skills training with their own part-time lab instructors to allow students to practice the skills they are learning. We also supply suggested lab curricula, checklists, and resources to support your instructors.

Are there Required Textbooks?

There are no required textbooks. However, PMC does provide suggested textbooks. For more info, please download the Course Catalog. Many schools purchase a set of textbooks and loan/assign them to students during the semester, but this is optional.

What About Certification Exam Fees?

Many PMC courses culminate in students sitting for nationally-recognized certification exams. This cost is not included in course tuition. But you may easily sign up with American Allied Health to register and/or pay for your students' certification.

Why Offer the Healthcare Pathway in your CTE Program?

Adding a healthcare pathway to your CTE program gives students direct access to one of the fastest-growing career fields in the nation. Healthcare training not only equips students with practical, in-demand skills but also provides a clear path to certification and employment after graduation.
